1 [Minimum-energy broadcasting in multi-hop wireless networks using a single broadcast tree](#)

Ioannis Papadimitriou, Leonidas Georgiadis

June 2006 Mobile Networks and Applications, Volume 11 Issue 3

Publisher: Kluwer Academic Publishers

 Full text available: pdf(1.11 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper we address the minimum-energy broadcast problem in multi-hop wireless networks, so that all broadcast requests initiated by different source nodes take place on the same broadcast tree. Our approach differs from the most commonly used one ...

Keywords: approximation algorithms, minimum-energy broadcast, performance analysis, spanning trees, wireless networks

2 [Succinct ordinal trees with level-ancestor queries](#)

Richard F. Geary, Rajeev Raman, Venkatesh Raman

October 2006 ACM Transactions on Algorithms (TALG), Volume 2 Issue 4

Publisher: ACM

 Full text available: pdf(472.00 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We consider *succinct* or space-efficient representations of trees that efficiently support a variety of navigation operations. We focus on static *ordinal* trees, that is, arbitrary static rooted trees where the children of each node are ordered. ...

Keywords: Succinct data structures, XML document representation

3 [Tree induction vs. logistic regression: a learning-curve analysis](#)

Claudia Perlich, Foster Provost, Jeffrey S. Simonoff

December 2003 The Journal of Machine Learning Research, Volume 4

Publisher: MIT Press

 Full text available: pdf(263.37 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

Tree induction and logistic regression are two standard, off-the-shelf
